

STACKDOOR

ABOUT STACKDOOR

Stackdoor is a lightweight security system design for maximum visibility without compromise on security. A revolutionary shutter system, the Stackdoor range allows installations into contemporary curved and corner building profile designs.

STACK-AND-PIN TECHNOLOGY

Stackdoor features pin-to-profile technology and the chain drive system provides self-locking and prevents lifting, **without the need for additional auxiliary locks.**

- Double-stack capability available for specialist applications with small headroom requirements
- Maximises visibility without compromising on security, Stackdoor can be installed anywhere
- Made in Great Britain: All assembly takes place in our Reading factory

THE STACKDOOR KEY FEATURES

Security rating available

Tested and certified to LPS 1175: Issue 8. The only 80% free area security shutter to achieve independent security certification

Self-locking technology

All Stackdoor shutters feature unique self-locking technology unlike any other standard security shutter

Large maximum width

Large widths of 20meters plus can be secured without the need for intermediate guide rails

Curve in plan capability

Without the need for intermediate guide rails, Stackdoor can follow even the most unique profiles in plan

STACKDOOR

FIRST 80% FREE OPEN AREA SHUTTER WITH **INDEPENDENT SECURITY CERTIFICATION**

Stackdoor Secure is the first 80% free open area security shutter to be certified to the LPCB security standard LPS 1175 Issue 8.

Having undergone rigorous testing within the recently revised independent security standard, Stackdoor Secure has successfully achieved Security Rating A1.

Stackdoor Secure has the Secured By Design (SBD) stamp of approval.

THE STACKDOOR RANGE

STACKDOOR STANDARD

Revolutionary stacking technology with 80% free airflow. Small stacking zone at high level.

STACKDOOR CORNER

Secure corner detail without intermediate guide rails. No compromise on existing facade.

STACKDOOR COMPACT

For applications with a large aperture but limited headroom. Unique double-stack capability.

STACKDOOR VERTICAL

Specialist system that allows shutter to be recessed into ground or ceiling, providing directional flexibility.

STACKDOOR CURVED

Curved in plan to follow unique building profiles, curved façades and entrance portals.

STACKDOOR SECURE

First 80% free open area shutter with independent certification to LPS 1175: Issue 8, Security Rating A1.
